

# Valuing Life for All

## Q & A with Save the Storks

### Defend Your Life-Affirming Views in Less than a Minute

The science of embryology teaches us that at the moment of conception, a human zygote is a living, distinct and whole human being. It's helpful to remember the SLED Acronym. The Size, Level of development, Environment, or Degree of dependency does not make one person less or more valued than another.

### How is For Life For Women?

By helping women overcome the pressures they feel pushing them toward abortion (like economic hardship or poor relationships), we can give women the power to rise above their circumstances. Pregnancy centers offer education and holistic care to women empowering her to choose a better life for herself and her child.

### Why Do Women Choose Abortion?\*

- 73% are influenced by economic stress
- 64% say they feel pressured by others
- 48% are uncertain about their relationship
- 12% experience health risks
- < 1% due to rape or incest

### What Can You Do?

- Pray for those facing unplanned pregnancies
- Take our Start Course (sign up today at [startcourse.org](http://startcourse.org))
- Download the "Dare to be a Dad" devotional on the YouVersion Bible app or on our website [savethestorks.org/dad](http://savethestorks.org/dad)
- Volunteer at your local pregnancy health center
